

GATT

Changing the Future of Surgery

InnoTep 2021

Nijmegen, The Netherlands

September 2021 | GATT Technologies BV

Op de conferentie is gedeeltelijk vertrouwelijke informatie over ons product gedeeld. Alle niet-vertrouwelijke informatie over onze oplossing voor ernstige bloedingen en lekkages, die o.a kunnen optreden bij en ten gevolge van operaties, is te vinden op onze website <https://www.gatt-tech.com/>.

Large surgical blood losses are still frequent and associated with mortality, prolonged hospitalizations, high costs, and reoperations. Leveraging its patented technology, GATT Technologies has developed the a platform that aims to be the next frontier in the global market of hemostats and sealants: our platform is faster, more effective, more versatile, and more cost effective than alternatives currently in the market. It addresses significant unmet needs in managing complex surgical bleeding.

Silicon review published its annual listing of best healthcare companies to watch globally in 2021. GATT is proud to be listed as one of them.
